

How to Recycle Composite Packaging

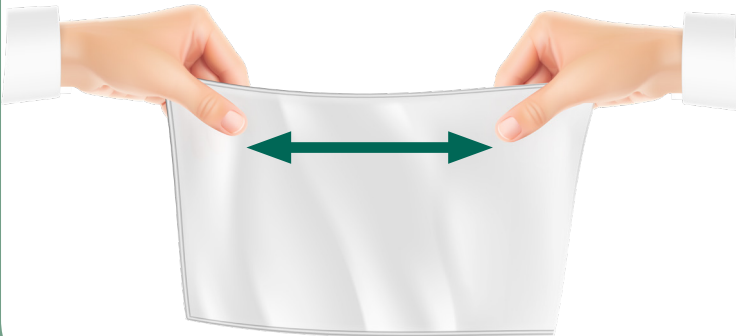

1. Separate it

If you don't have time to separate set aside for later

Composite packaging is made with **TWO or MORE** different types of material such as paper & plastic

2. Tear-test it

If the paper doesn't tear, it's **NOT SUITABLE FOR RECYCLING!**
i.e. Wax Paper

3. Dispose of it

RECYCLE separated items

If **UNSURE** or **TOO BUSY**, use the general waste bin
